TAKING THE CENSUS.

How the Work is Divided and Sub-Divided Throughout the Country. From the Washington Post.

The census of 1880 will be a remarkable piece of literature. It will be an accurate and exhaustive report of births, deaths, codfish, changed, and has since then demanded the name, sex, age, color, birth-place and occupation of each individual. Ability to read and write is also included, and thus we were to settle over us but the man

Experts are already in the field obtaining statistics of gold, silver, iron and copper mining. The working force is now taking the census of the great lakes, getting the fishing population.

"Under the Census act of 1879," said Gen. Walker to a Post reporter, "we are required to investigate nearly every known industry-railroads, fire and life insurance, telegraph and express companies. Agricultural resources, timber culture, all manner of social and industrial statistics are now being collected. accuracy and reliability in the reports. An eminent geologist is now working up the quarrying industry; social scientists are busying themselves with the statistics of cities, persons and reformatory institutions. A specialist who las devoted years to the subject will

you will get more accurate results?" magnanimity in pecuniary matters lines still closer and take the census in all cities where the population is over 10,000 within two weeks. We shall try to avoid the June exodus, which would, very natually, cause people to be counted twice, if the time were not limited."

"But has not the 1st of June always been census day?"

"Theoretically, but practically, the work took five months." When examined, the statistics on which the mortality tables are based are very unreliable. In very few States deaths rigidly enforced.
